## I AM YOUR FORESTER

Jim McGannon

YOU CAN'T MANAGE  
WHAT YOU DON'T  
MEASURE

## Serving the Front Range Communities from southern Colorado to the northern border

I am a professional forester, arborist, and natural resource expert that provides consulting services in these fields.

Specifically, I prepare forest management plans, wildfire mitigation plans, urban forestry planning, landscape damage appraisals, and much more related to these fields.

## Why Hire a Consulting Forester?

A consulting forester asks about your ownership goals, collects inventory information from your woodlands and suggests alternatives for reaching your goals. A consultant can draft a written management plan that incorporates your goals and the steps for accomplishing them.

## Consultation Services Offered

- Forest Management Plans
- Habitat Improvement Planning
- Wildfire Mitigation Planning
- Defensible Space Inspections
- Forest Inventory and Analysis
- Forest Restoration Planning
